

Remainder gauge for a drum

IMB-900

Have you ever had such an experience?

“It was too late when finding the drum empty. ”
“It takes three days to get it in hand on immediate order.”

It shows the amount of the remainder in a drum, when comes down to 1/3.
It is hard to find the amount of remainder without the gauge,

IMB-900

It is easy to set.
Just put it in the smaller mouth of the drum to be fixed.

When the remainder comes down to 1/3, the float shows the level of the remainder along with the surface of liquid.
Then you can never miss the timing for placing order.

There are three colors of level gauge that you can chose, yellow, red and green.

They are **fluorescence colors** that jump to the eye.

Please use it properly according to the type of oil solution or the air of placing the drum.

Please indicate the color when placing the order.
